2026 EDITION

Profile

Licensed architect with 8+ years of experience and Autodesk-authorised Revit Architecture training. Currently delivering Revit documentation for an Australian volume builder in a hybrid offshore team, with a focus on house siting, covenant and planning compliance, and coordinated working drawings.

This portfolio brings together Australian residential and joinery work, international projects in Iraq, and local residential and retail commissions, selected for documentation and drafting depth.

Software
Revit (Advanced) · AutoCAD · SketchUp · Enscape

Credentials
Registered Architect, PRC (valid to Aug 2027)
Autodesk Revit Architecture course certificate, Autodesk Authorized Training Center (Feb 2024)

Client confidentiality
Client names and branding are blurred or withheld where required.

Australian Residential Siting & Working Drawings

WorkstreamPH · Australian volume builder (post-sales)
Mar 2025 – Present · Revit Specialist · Hybrid

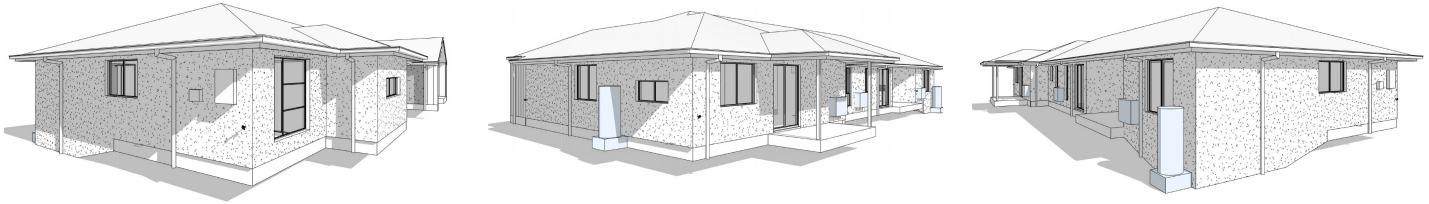

Post-sales documentation for an Australian residential builder, taking standard house designs through siting, compliance and coordinated working drawings for individual lots.

- Siting houses on lots from land data, contours and easements
- Checking designs against developer covenants and planning guidelines
- House-to-lot compatibility checks to cut redesign and approval delays
- Coordinated Revit sets: architectural, electrical, plumbing, landscape
- Clash detection across masterplan data sets

Client details, addresses and builder branding removed from all sheets.

A Artist impression: primary + secondary dwelling

B Further 3D views. Working drawings are covered by a client NDA and are shown only on request.

02

West Qurna Police Station

West Qurna, Iraq · AWI – Ability with Innovation
2023 · Designer & Draftsman

A single-storey civic building planned around security and operational workflow. I developed the design and prepared the architectural documentation, coordinating with structural, mechanical and electrical teams so the building systems fit the layout.

The stone-clad façade, vertical slot windows and framed entry give the station a strong, recognisable civic identity.

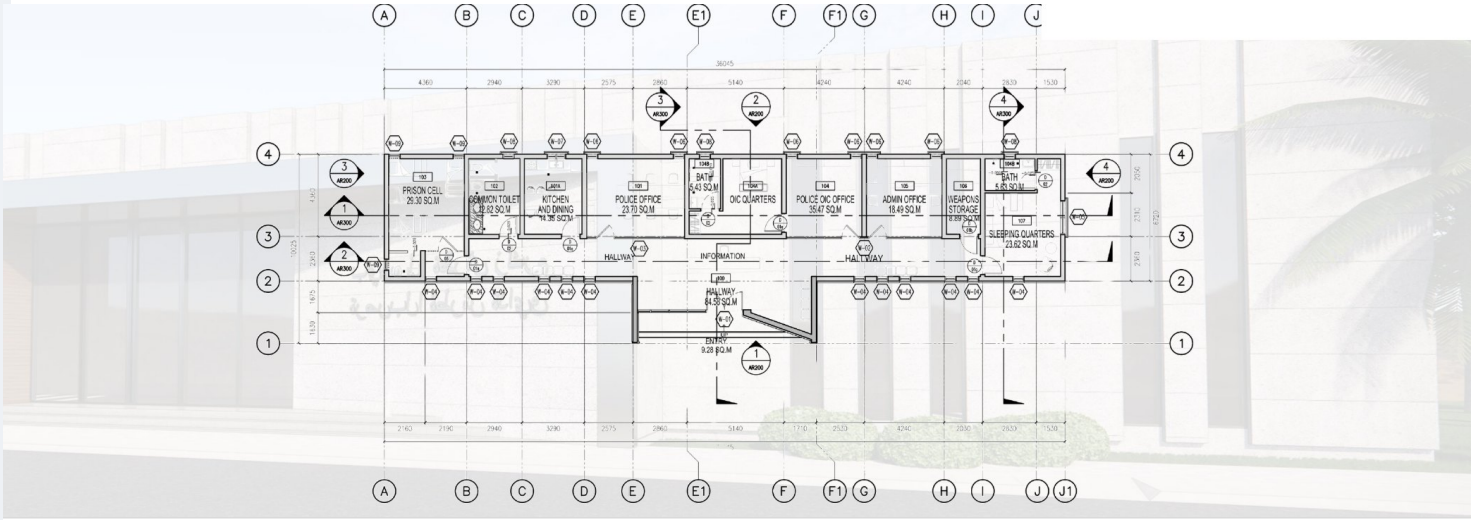

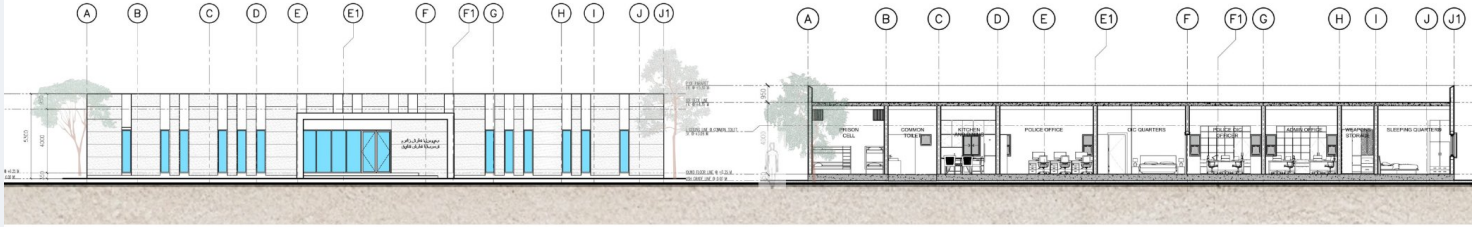

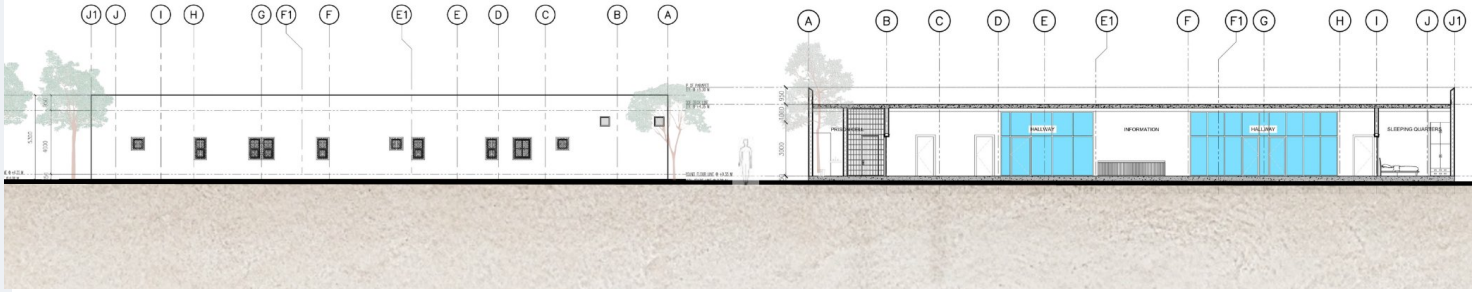

02

West Qurna Police Station

Floor plan, elevations and sections

03

G+3 Apartment Building

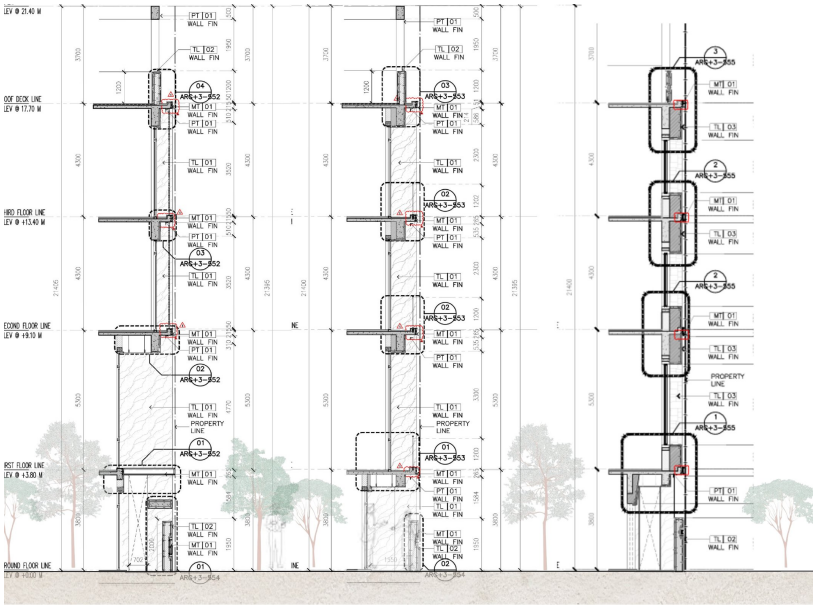

Iraq · AWI – Ability with Innovation
2023 · Façade detailing & documentation

A four-level residential building. My role focused on façade detailing: elevations with material and finish tags, and wall sections through each floor showing the cladding, openings and parapet details.

Detailing was refined with the design team to balance local climate, material availability and buildability.

Front elevation

Wall sections & façade details

04

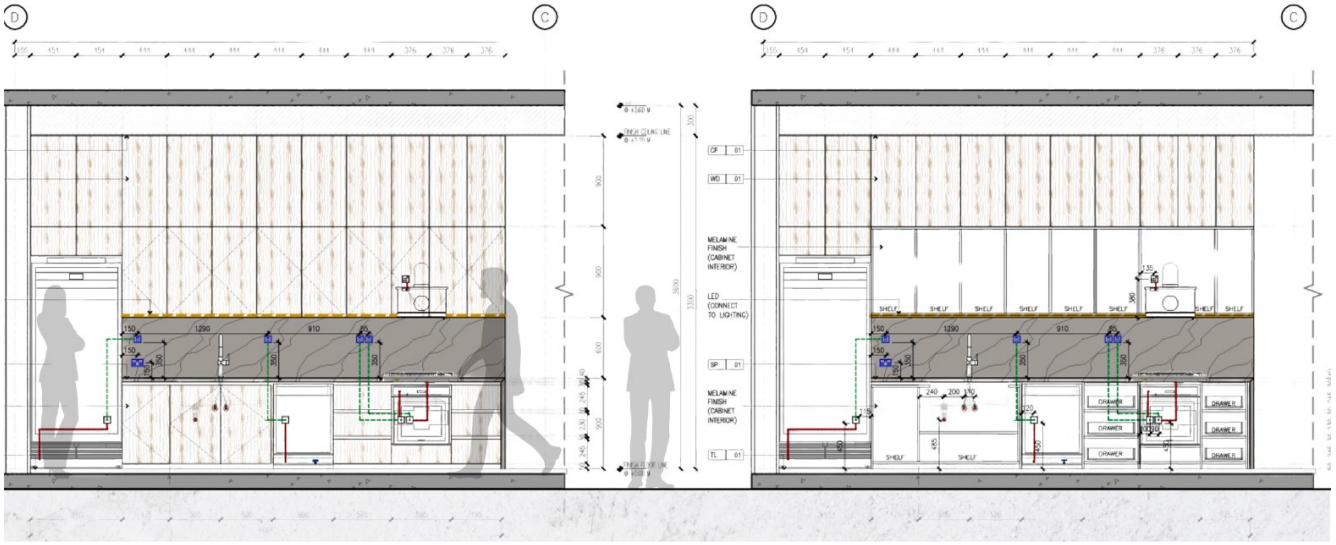

7-Bedroom Residence, Al Safa Estate

Basra, Iraq · AWI – Ability with Innovation
2023 – 2024 · Fit-out & joinery documentation

Fit-out and joinery documentation for a large family residence. I prepared interior elevations and joinery drawings for wall panelling, ceilings and built-in furniture, with lighting and services coordinated in each elevation.

Drawings were set up for contractors and joiners to build from, with dimensions, finishes and fixing notes on every sheet.

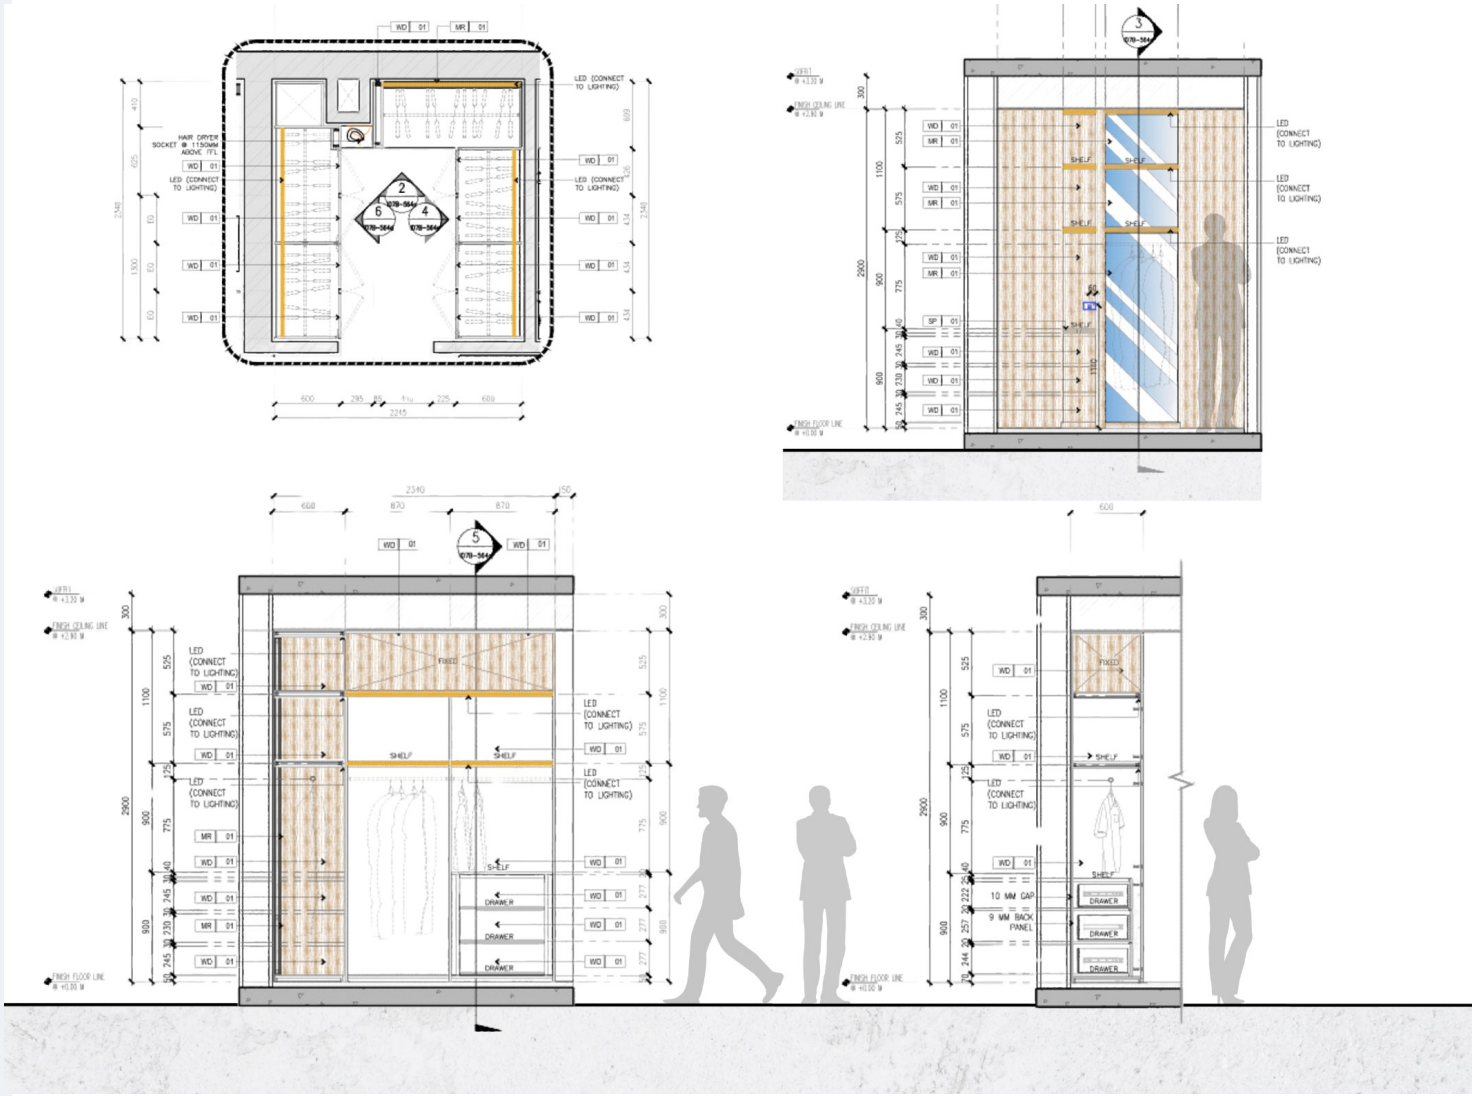

04

7-Bedroom Residence, Al Safa Estate

Walk-in robe and wardrobe joinery: plans, elevations and sections

05

Residential Kitchen Joinery & Fit-out

Australia · Delivered for an Australian design firm
2025 · Freelance · Joinery & fabrication drawings

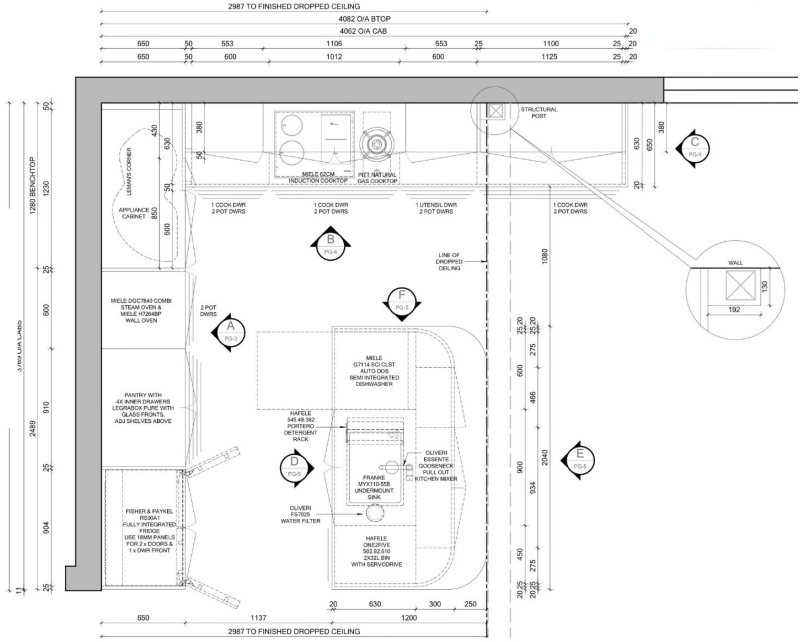

Bespoke kitchen and pantry joinery for an Australian client. Starting from the designer's plans and a site check-measure, I produced fabrication drawings: plans, elevations and sections for every run of cabinetry, with appliance and hardware schedules.

The set went through several rounds of client mark-ups, each issued with an amendment log, until it was approved for manufacture.

Client name withheld.

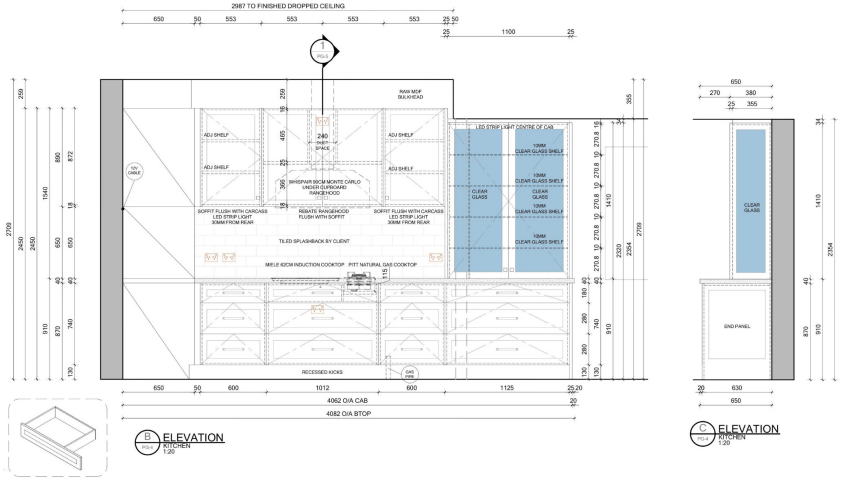

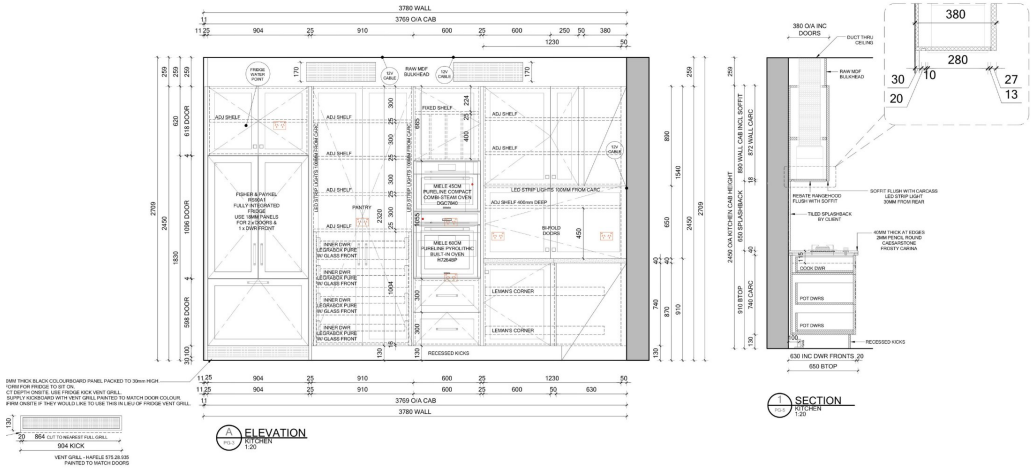

05

Residential Kitchen Joinery & Fit-out

Cabinetry elevations and sections, issued for manufacture

06

Retail Boutique Fit-out

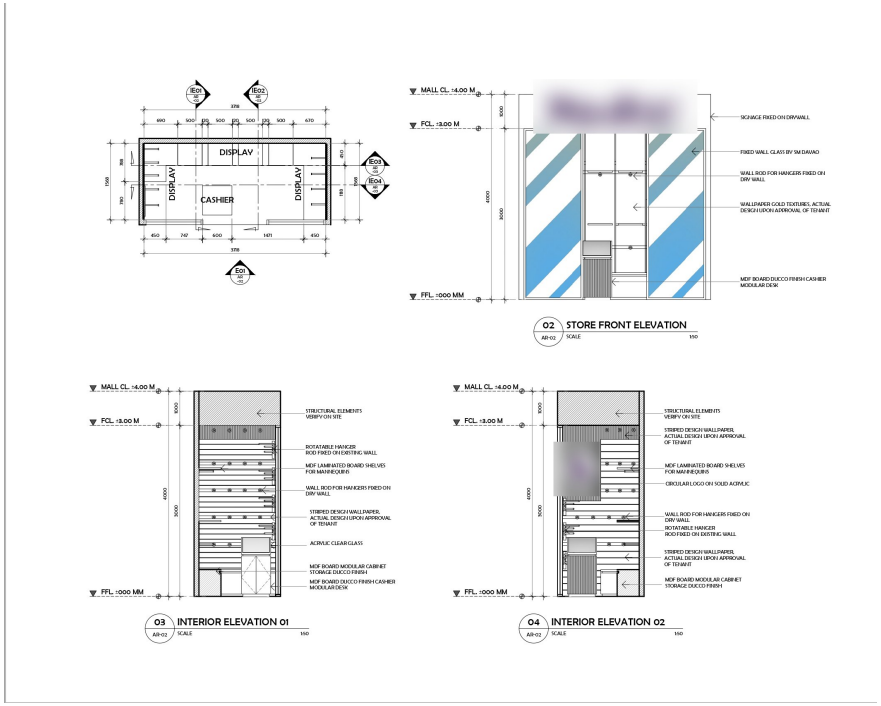

SM Mall, Davao City · Freelance
2024 · Design, documentation & renders

A compact fashion boutique inside a mall tenancy. I produced the concept, renders and the fit-out set: floor plan, store-front elevation, interior elevations and electrical layout, prepared to the mall's tenant requirements.

Client name and branding blurred.

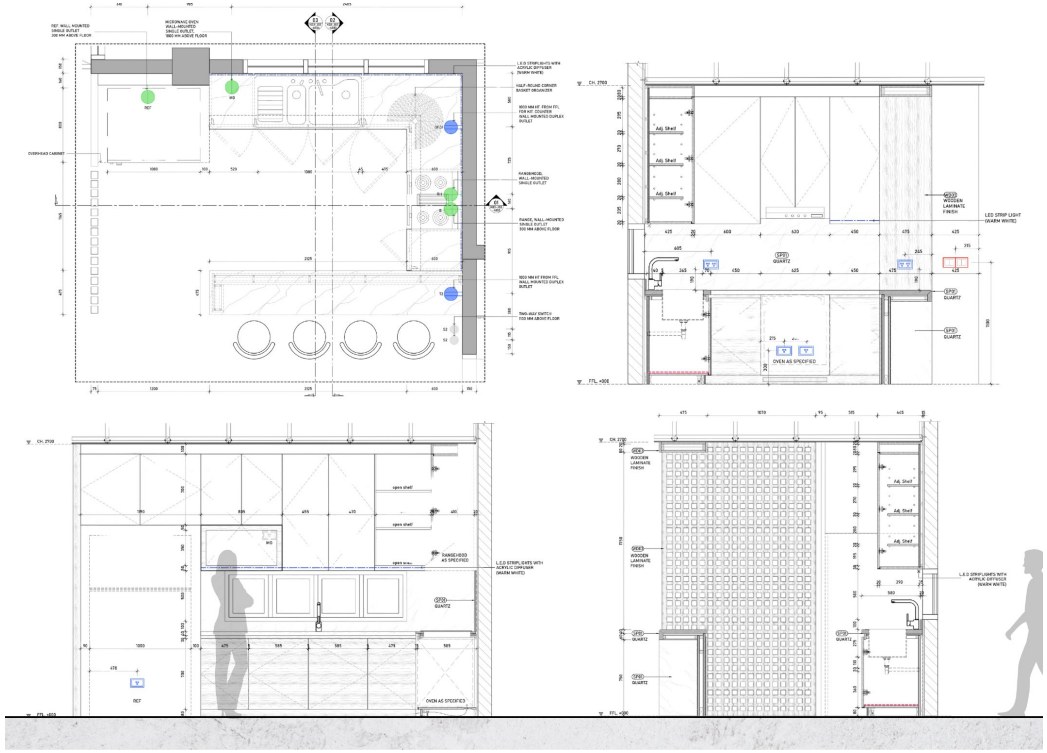

07

Residence Interiors & Joinery

Tagum, Davao · With B&T; Studio (interior design)
2019 · Design development & joinery drawings

Design development drawing package for a private residence, taking it from concept to construction. I refined layouts and produced the technical drawings, with a focus on bespoke cabinetry, millwork and interior elements.

08

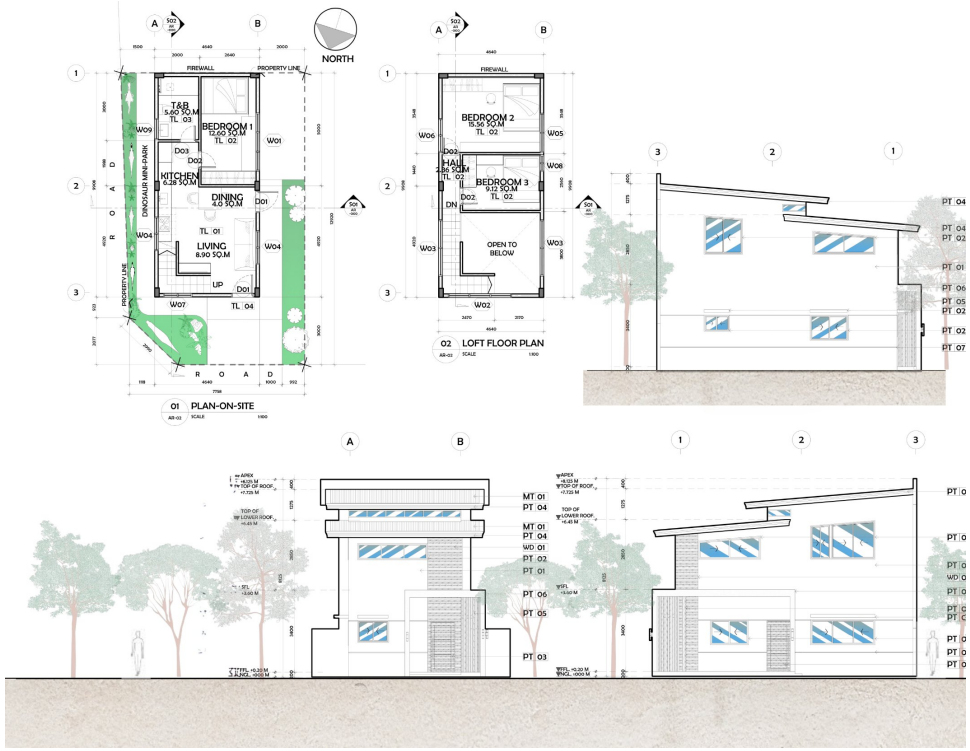

Two-Storey Loft Residence

Sariaya, Quezon Province · Freelance
2023 · Lead designer · Design & documentation

A family home planned closely with the owner. The loft-style concept makes the most of a compact footprint, with a high-ceiling living area that improves light and ventilation. I handled the design, renders and drawing set: site plan, floor plans and elevations.

Part of a private commission that also included a two-unit apartment building, both designed by me.

Thank you
